

# PREVENT ROAD STRUCTURE COLLISION IN 2 STEPS

## 1 Check the overall vehicle height. Adhere to speed and height limits.

### Before driving off:

- Lower the rear platform or crane on vehicle.
- Measure the total height of vehicle, including its load and equipment. Apply for (auxiliary) police escort in advance, if the total height exceeds 4.5m.
- Do ensure the Height Warning System in lorry cranes is in working condition to provide sufficient audible warning to alert lorry crane drivers to retract the crane before moving off.
- Comply with height limits and drive safely within the speed limit.

Remember to retract the crane adequately before driving!

## 2 Plan your route

Plan your driving route in advance to ensure the overall vehicle height is below the height limit of road structures along the way.

To check road structures' height limits and road closures, log on to:

- [Prompt.lta.gov.sg](https://prompt.lta.gov.sg) > 03 Oversized Vehicle Permit > Q8 FAQs > Guidelines and Requirements (Q12)
- <https://onemotoring.lta.gov.sg> > Driving > Traffic Information & Road Works > Traffic Updates, Road Closures & Road Works

## Risks

- Fatal injuries or death to the driver, passengers and other road users.
- Potential claims arising from the collision (e.g. repairs to the damaged structure and vehicles, personal injuries or property damage).
- Potential loss of income when the vehicle and driver are off the road.
- Prosecution and higher insurance premiums.

## Maximum Penalties

Road Traffic Act	Offence	Fine and/or Jail		Driving Licence
Section 65A Cause heavy vehicle to collide with building or structure	First	\$5,000	2 years	-
	Repeated	\$10,000	5 years	-
Section 79 Drive heavy vehicle more than 4.5m in overall height without police escort	First	\$2,000	1-3 years	Disqualified for at least 1 year
	Repeated	\$5,000	2-5 years	Disqualified for at least 2 years

# 两个预防撞毁公路设施的简单步骤!

## 1

### 预先检查车辆的总高度，并时刻遵守车速及高度限制

#### 开车前：

- 把车斗或起重机吊臂收好。
- 测量车辆的总高度、承载的物品和设备的高度也必须包括在内。若车辆总高度超过4.5米，必须提前申请辅警护送。
- 请确保装置在卡车起重机的高度警报器操作正常，以便在车子启动前，鸣响警报提醒司机收起吊臂。
- 严格遵守高度限制，并在准许的车速内，安全行使。

## 2

### 预先规划路线

为了确保车辆的总高度在沿途经过的公路设施限制下，司机应该在开车前，预先规划好行使路线。

有关公路设施的高度限制和道路关闭的讯息，请登录以下网址：

- [Prompt.lta.gov.sg](https://prompt.lta.gov.sg) > 03 Oversized Vehicle Permit > Q8 FAQs > Guidelines and Requirements (Q12)
- <https://onemotoring.lta.gov.sg> > Driving > Traffic Information & Road Works > Traffic Updates, Road Closures & Road Works

## 因疏忽导致车祸所须承担的风险

- 可能导致肇祸司机、乘客、或其他公路使用者严重受伤或丧命。
- 因车祸而可能须赔偿他人损失(如设施和车辆的维修费、赔偿伤者的医药费或财物损失等)。
- 因车辆损坏需维修和司机受伤无法开工而导致的经济损失。
- 因车祸被起诉和须缴付更高的保险费。

## 最高刑罚

公路交通法令	违犯次数	罚款和/或监禁		驾驶执照
第65A节 导致重型车辆撞毁建筑物或设施	初犯	\$5,000	两年	
	再犯	\$10,000	五年	
第79节 在无警方人员护送下驾驶总高度超过4.5米的重型车辆	初犯	\$2,000	一至三年	吊销执照至少一年
	再犯	\$5,000	二至五年	吊销执照至少两年
