Dear Sir/ Madam

COMMERCIAL VEHICLE EMISSIONS SCHEME – FIXED EVOLUTION COEFFICIENT FOR THE CARBON DIOXIDE EMISSION VALUES FOR LIGHT COMMERCIAL VEHICLES

1. We refer to our earlier circular (LTA/VAC/V30.000.000/7) dated 26 March 2021 announcing that from **1 April 2021**, the Commercial Vehicle Emissions Scheme (CVES) will be introduced for all new and imported used Light Commercial Vehicles (LCVs) – light goods vehicles, goods-cum-passenger vehicles and small buses, all with maximum laden weight (MLW) not exceeding 3,500kg.
2. LTA will allow the use of the fixed Evolution Coefficient (EC) of 0.92 for the Carbon Dioxide (CO₂) emission values for LCVs (tested under the UNECE Regulation No. 101¹) imported by parallel importers. Motor dealers can submit a request together with the batch approval application in VITAS for the use of the fixed EC of 0.92 for the CO₂ emission values for LCVs from **1 April 2021**. The conditions and requirements for such request are similar to what have been put in place for batch approval applications for cars.

¹ “UNECE Regulation No. 101” means the most current version of Regulation No. 101, a Vehicle Regulation of the United Nations Economic Commission for Europe, available on the official website of the United Nations Economic Commission for Europe at <http://www.unece.org>.

3. Please inform your members on the above. If you have any enquiry or require any assistance on the matter, you may contact Mr Han Hang Kwang on DID: 6553 5263 or Mr Neo Aik Hing on DID: 6553 5700.

4. Thank you.

Yours sincerely

Tan Zhi Chiang
