Our ref VRL/18/2024

Dear Sir/Madam

Electronic Day Licence (e-Day Licence) for Classic and Vintage Vehicles

From 1 January 2025, LTA will be replacing the current paper day licences for vehicles registered under the Classic, Revised Vintage and Vintage (Restricted) Vehicle ('CVV') Schemes with electronic Day (e-Day) Licences. Owners/drivers will no longer need to display a paper day licence on their vehicle's windscreen when using it on the roads.

To drive the classic and vintage vehicles, CVV owners would need to buy an e-Day Licence or enter the usage date of their free e-Day Licence (for classic vehicles) through LTA's OneMotoring portal. Classic vehicle owners will receive 28 free e-Day Licences, instead of paper day licences, when they renew the annual road tax for 2025.

The introduction of e-Day licences will bring greater convenience for owners of classic and vintage vehicles as they can conveniently perform the e-Day Licence services online through LTA's OneMotoring portal, up to 2 weeks in advance of the intended usage date. If they are unable to enter the usage date of their free e-Day Licences (for Classic Vehicles) or buy the e-Day Licences prior to the use of the vehicle, they have up to 11.59 pm on the next day after the usage of the vehicle to do so.

There are no changes to the usage restrictions under the respective schemes. The above for your information and dissemination as required.

Thank you.

Yours faithfully

Neu Siew Lay (Ms)
Deputy Director
Vehicle Quota and Registration
