Dear Sir/Madam

Lodgement Service for Overnight Parking of Heavy Vehicles

Following engagements with industry stakeholders, LTA will introduce a Lodgement Service for Overnight Parking of Heavy Vehicles from **15 September 2026**.

Under the new service, owners of heavy vehicles (excluding trailers) may declare their overnight parking arrangements with LTA at no charge, provided they have obtained written consent from the owner or occupier of the premises where the vehicle will be parked. Once the overnight parking arrangement has been successfully lodged through OneMotoring, the vehicle owner will not be required to obtain a Vehicle Parking Certificate (VPC) for transactions such as vehicle registration, transfer of ownership and road tax renewal.

The Lodgement Service is an expansion of the VPC Scheme by providing an additional way for heavy vehicle owners with suitable private overnight parking arrangements to meet overnight parking requirements. The existing VPC scheme will continue to be available for vehicle owners who wish to park their vehicles at licensed Heavy Vehicle Parks.

Eligible Parking Locations

Heavy vehicle owners may lodge overnight parking arrangements at eligible private premises, such as:

- Industrial facilities
- Commercial properties
- Authorised worksites
- Approved Ministry of Education (MOE) schools for school buses (subject to the school's approval)

The following locations are **not eligible** for lodgement:

- Parking spaces within licensed Heavy Vehicle Parks
- Residential areas, including private housing estates
- Public roads

Heavy vehicle owners remain responsible for ensuring that their vehicles are parked safely and lawfully at all times. Enforcement action will continue to be taken against vehicles parked indiscriminately on public roads.

For more information, please refer to the enclosed news release.

Please bring the contents of this circular to the attention of your members and staff accordingly.

Thank you.

Yours sincerely

Candice Yeo (Ms)

New Lodgement Service for Heavy Vehicles

The Land Transport Authority (LTA) will introduce a new lodgement service for overnight parking of heavy vehicles¹ from 15 September 2026, as part of an expansion of the existing Vehicle Parking Certificate (VPC) scheme.

2 Today, the VPC scheme requires heavy vehicle owners to secure a designated parking lot between 12am and 6am, before they can register a new vehicle, transfer ownership, or renew road tax. Introduced in 1994, the scheme sought to ensure that heavy vehicles are parked responsibly to curb indiscriminate parking. As the operational needs of industry have evolved, the Government has received feedback that greater flexibility in overnight parking arrangements would better support these needs.

3 LTA will therefore introduce an alternative way for heavy vehicle owners to meet the overnight parking requirements, as required under the VPC scheme, through a new lodgement service. This will give heavy vehicle owners more parking options in meeting their operational needs.

4 Under this service, owners will be allowed to park their heavy vehicles overnight at suitable locations within private and non-residential premises² that are not formally designated as licensed heavy vehicle parking spaces. They will be required to lodge the parking location via the OneMotoring Digital Service and submit proof of parking consent from the premises owner of that parking location. Each lodgement can be made for a period of up to two years at no fee. Upon a successful lodgement, owners will receive a letter of acknowledgement from LTA, and be regarded as having met the VPC overnight parking requirements for the purposes of registering a new vehicle, transferring ownership or renewing road tax.

5 Owners who opt for the lodgement service will be responsible for ensuring that their parking arrangements comply with parking rules, and do not cause public disamenities or pose safety hazards to others. In accordance with existing rules, owners will also not be allowed to park their heavy vehicles on public roads or in residential estates. Those who are found non-compliant with the lodgement requirements will have their lodgement revoked. LTA and the relevant authorities will step up enforcement efforts against indiscriminate parking of heavy vehicles along public roads.

¹ The lodgement only applies to any heavy goods vehicle or concrete mixer whose maximum laden weight is more than 5,000kg, and any bus with a seating capacity of more than 15 persons, not including the driver. Trailers are undergoing a two-year trial on the suspension of VPC requirement from 6 February 2026, following industry feedback and in consultation with the Singapore Transport Association.

² Such premises include industrial facilities, authorised worksites and commercial properties.

6 This lodgement service is part of LTA's broader efforts to ensure that the VPC scheme remains relevant and responsive to industry needs, while curbing the indiscriminate parking of heavy vehicles. The Government will continue to review the VPC scheme and facilitate the provision of additional heavy vehicle parking spaces where needed.
